

COMMUNITY UPDATE

The mission of DTSC is to protect California's people and environment from harmful effects of toxic substances by bringing contaminated resources into compliance with state law, reducing hazardous waste generation, and encouraging the manufacture of chemically safer products.

Environmental Investigations Update

for Magnolia Elementary School in Exeter

Yes, since sampling of indoor air began in 1994, the DTSC has been monitoring the school for both staff and students.

As an added protective measure, AMETEK worked in the school to address the depression and air leakage in all classrooms and the underlying soil vapors from entering indoor air. A vapor barrier was installed in the classroom building.

How Can
